Statement from President - Africa Region

Africa is a continent endowed with immense natural resources and profound developmental potential. However, persistent structural challenges ranging from geopolitical instability and governance deficits to critical infrastructure gaps historically constrain its macro-economic growth. To mitigate these challenges, The Mazok Afrika Group Ltd targets high-impact interventions across vital economic sectors. The Group drives strategic solutions in sustainable energy, water security, transport infrastructure, healthcare facilities, education, communication networks, and agricultural supply chains.

By establishing an inclusive operational framework, the organization empowers regional human capital to catalyze sustainable socio-economic transformation. Operating with strict political neutrality, The Mazok Afrika Group Ltd refrains from political alignments, choosing instead to serve as a trusted institutional partner to governments and public sector leaders across the continent. Since its inception in 2012, the Mazok Afrika has positioned itself as a premier multinational consortium specializing in consulting, construction, technology, and green energy solutions. Headquartered regionally across Kenya, Uganda, and Tanzania and supported by international offices in Germany and Croatia the enterprise successfully bridges African markets with global strategic networks.

Mazok Afrika actively collaborates with international stakeholders across Europe, Asia, and the Americas to optimize local talent retention and curb outward migration. Committed to corporate governance, accountability, and professional excellence, leadership invites global enterprises, institutional investors, and non-governmental organizations to join its collaborative ecosystem. Through strategic public-private partnerships, the Group remains dedicated to driving scalable economic advancement and securing long-term prosperity for future generations.

Mr. Martin Okore

PRESIDENT - AFRICA REGION
-DIRECTOR
THE MAZOK AFRIKA GROUP LTD

Executive Statements

Mr. Zoran Zovko

VICE-PRESIDENT - AFRICA REGION
- CHIEF EXECUTIVE OFFICER
- DIRECTOR

The Mazok Afrika Group Ltd delivers elite expertise and professional solutions alongside project owners. We welcome new ideas, open dialogue, and collaborative partnerships to address complex project challenges, tailored entirely to your specific concept needs.

The global financial landscape has transformed significantly. Following past crises, lending institutions played a critical role in stabilizing global economies and preventing a major depression. However, monetary policy and lending frameworks cannot return to the old status quo, forcing institutions outside their comfort zones to navigate a rapidly changing environment.

We are actively driving the debate on the future of monetary policy and independent development within this "new normal." Addressing these large-scale challenges requires extensive cooperation. We are engaging with monetary authorities, governments, and leading thinkers to shape the future of commercial infrastructure. We bring deep international experience to this multi-year endeavor, promising a dignified, transparent, and value-driven partnership for our investors.

Ms. Kayo Ikeda

EXECUTIVE FINANCE DIRECTOR
CHIEF LIAISON OFFICER-EASTERN EUROPE & AFRICA.

Welcome to a world where global warming is an increasingly significant influence on our everyday economy, politics, and lives. This is an issue driving public policy, utility market projections, alternative energy sources, and much more. As the threat of global warming grows, so does the potential for the renewable energy market to take off in fact, it recently has in several markets across the globe.

In order to look forward to a sustainable future, policy makers around the world have begun to plan for the long term, implementing programs dedicated to move from veteran polluters, such as oil and coal, to renewable sources, such as wind, solar, and geothermal, to power their electric grids. Today we can look around the world and see sustainability knocking on the back doors of many great, powerful nations around the world.

For where this knock has been answered, companies just like THE MAZOK AFRIKA GROUP LIMITED power and energy sector have been able to enter and make great strides on their services, while also making a statement on the future of sustainability, business, and quality of life.

Technical Team Addendum

At THE MAZOK AFRIKA GROUP LIMITED, our strength lies in our people. Our technical leadership team brings together decades of specialized experience, regulatory expertise, and hands-on mastery to deliver exceptional results for our clients across complex operations and engineering environments.

Stephen Aluoch K'Opot

LEGAL ADVISOR & CORPORATE GOVERNANCE EXPERT

Stephen is an Advocate of the High Court of Kenya with over 28 years of post-qualification experience spanning Corporate Governance, Secretarial Practice, Civil and Criminal Litigation, and general Commercial Legal Practice. He provides critical legal oversight for THE MAZOK AFRIKA GROUP LIMITED, bringing deep expertise in compliance procedures, Public Procurement law, Public-Private Partnerships (PPPs), and Civic Governance issues.

Peter Majiwa Owera

TECHNICAL MANAGER

Peter serves as the Technical Manager at THE MAZOK AFRIKA GROUP LIMITED, leveraging over 30 years of deep industry experience. A former technician with the Kenya Power and Lighting Company (KPLC), he later established himself as a licensed private contractor for the same utility. Peter specializes in pole laying, cable stringing, transformer installation, and comprehensive electrical wiring for both industrial plants and domestic properties.

Technical Team Addendum

Kennedy Omondi Miyoma

ELECTRICAL INSTALLATION SUPERVISOR

Kennedy brings a solid 15-year track record of supervisory expertise to the team. He is responsible for overseeing the safe, compliant, and efficient execution of complex electrical installation works, ensuring all projects meet rigorous safety and technical standards.

Patrick Omondi Mwalo

LOGISTICS TECHNICIAN

Patrick serves as a Logistics Technician, bringing 25 years of extensive experience in project planning, supervisory work, and logistics management. His deep operational expertise was forged over two decades of working with various major sugar companies across the Western Kenya region, making him highly skilled in managingcomplex supply chains and field operations.

Ambrose Som Onyango

ELECTRICAL & PROJECTS SPECIALIST

Ambrose is a vastly experienced specialist in pole laying and comprehensive electrical works. He brings proven field expertise to the team, having successfully executed several major projects for the Kenya Power and Lighting Company (KPLC), ensuring high standards of technical execution and grid infrastructure compliance.

The Mazok Afrika

THE MAZOK AFRIKA GROUP LIMITED is a prominent, multinational enterprise specializing in consulting, construction, engineering, technology, and green energy solutions. Founded in 2012, the Mazok is dedicated to driving scalable economic development and sustainable infrastructure across Africa, with a strong focus on high-impact sectors including energy grid modernization, water security, health, education, and transport. Headquartered regionally in Kenya, Uganda, and Tanzania, and supported by international offices in Germany and Croatia, the organization effectively bridges African emerging markets with global strategic networks. By collaborating with international institutional investors and partners across Europe, Asia, and the Americas, the Group actively works to retain local human capital and cultivate a prosperous, resilient ecosystem for future generations.

Engineering clean energy, secure water, and modern connectivity to power Africa's growth.

Our Services

We leverage our multidisciplinary expertise and global network to deliver scalable, high-impact infrastructure solutions. We bridge advanced engineering with sustainable practices to drive long-term economic transformation across the continent.

Green Energy & Power Solutions

We design, develop, and integrate renewable energy infrastructure to modernize national electric grids. Our solutions reduce reliance on legacy fossil fuels by deploying clean, resilient power alternatives.

01 Solar & Wind Energy

Developing utility scale generation plants and decentralized microgrids.

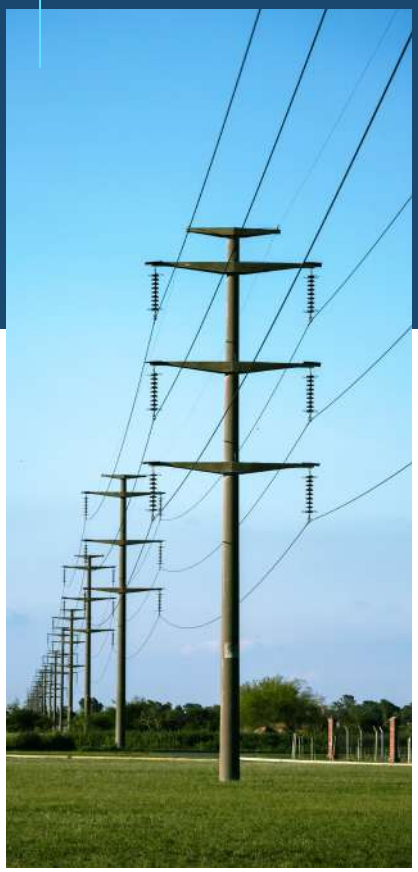

02 Geothermal Infrastructure

Tapping into sustainable baseload power sources to ensure grid stability.

03 Grid Modernization

Upgrading distribution networks to support alternative energy transitions.

Engineering clean energy, harnessing natural resources, and powering Africa's sustainable growth.

Engineering & Construction

Our engineering division delivers robust, turn-key civil and structural engineering projects designed to meet the rigorous demands of growing regional economies.

01 Transport Infrastructure

Constructing major highways, regional roads, and transit networks to enhance trade and connectivity.

02 Civic & Institutional Buildings

Engineering modern structures for health facilities, educational centers, and corporate facilities.

03 Project Management

Overseeing life-cycle development from initial land surveying to structural execution.

Water Security & Utilities

We deploy advanced civil and ecological engineering systems to secure, manage, and scale vital water distribution networks for both urban centers and rural communities.

01 Supply Networks

Engineering water processing plants and major pipeline distribution infrastructure.

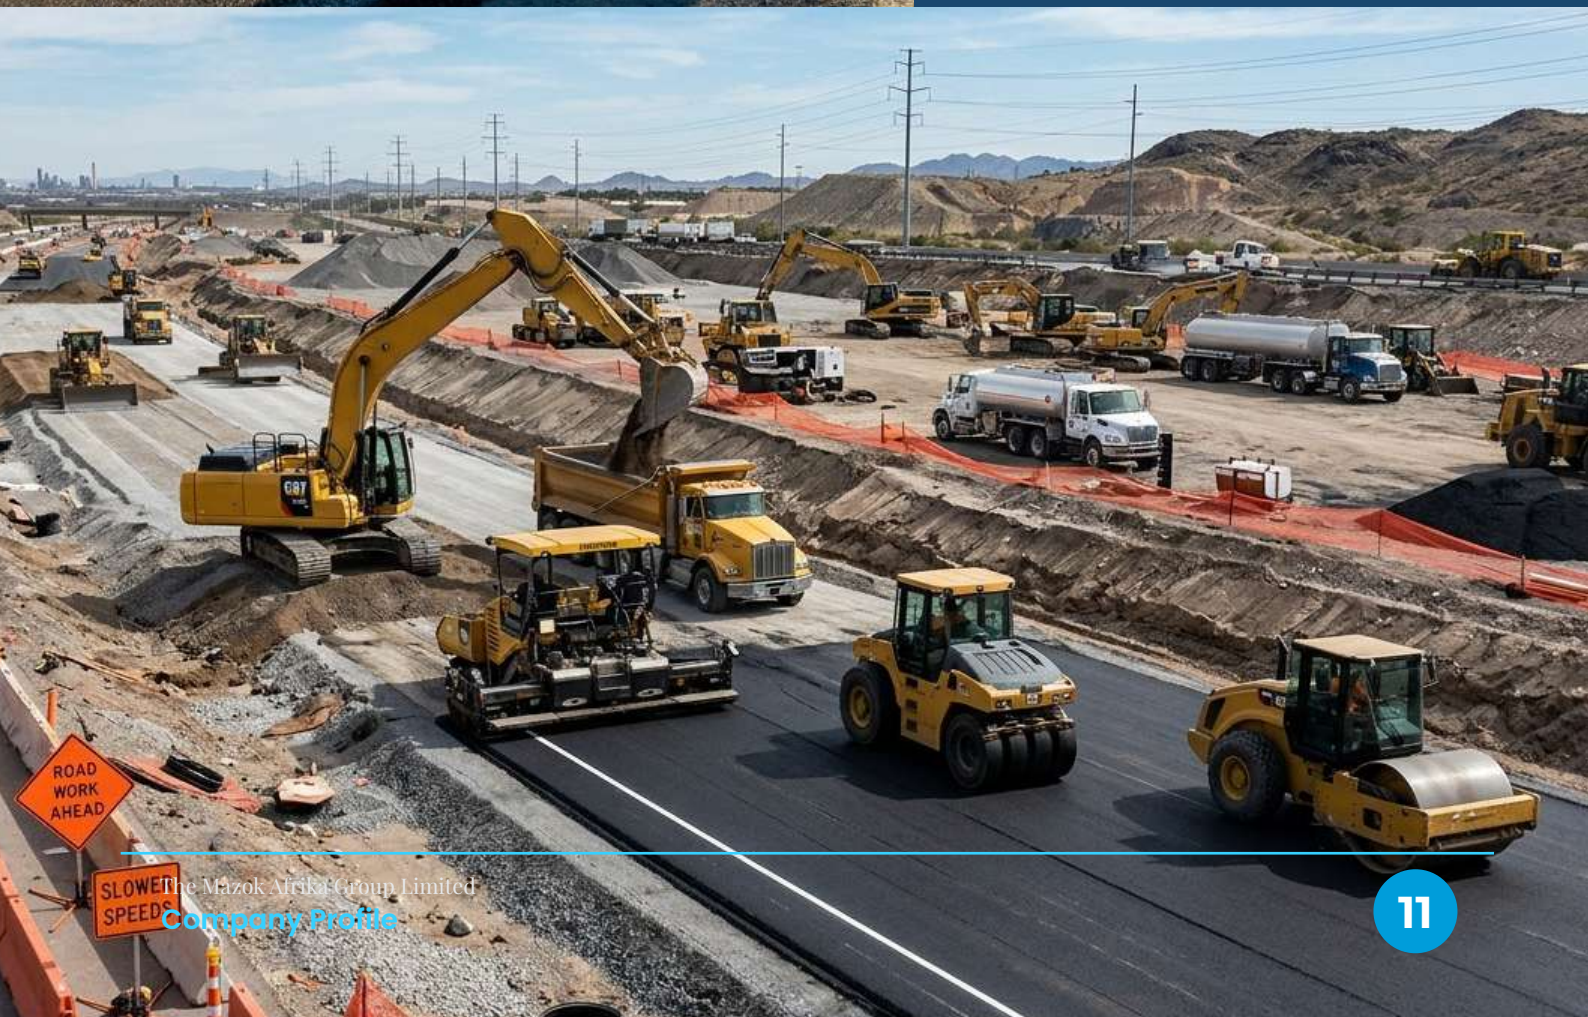

02 Resource Conservation

Implementing sustainable waste water treatment and large-scale agricultural irrigation supply chains.

Building smooth roads, resilient highways, and critical infrastructure to connect Africa's economies.

Industrial Technology & Communication

We accelerate digital transformation by deploying modern communications infrastructure and scalable technological frameworks.

01 Communication Networks

Building foundational digital connectivity infrastructure to support telecommunications and data exchange.

02 Smart System Integration.

Designing technology-driven monitoring and automated systems for large-scale utility tracking and industrial operations.

Strategic Consulting & Project Advisory

Acting as a trusted institutional partner, we offer specialized consulting services that bridge the gap between global investors, technical experts, and public sector stakeholders.

01 Public-Private Partnerships (PPP)

Structuring mutually beneficial developmental programs alongside governments and political leadership.

02 Feasibility & Market Research

Conducting macroeconomic projections, environmental impact assessments, and regulatory compliance framing.

THE MAZOK

Our Project Delivery Framework

At THE MAZOK AFRIKA, our execution methodology relies on strict governance, operational precision, and international standards. We deliver complex, large-scale infrastructure projects on time and within budget by adhering to uncompromising benchmarks for quality, safety, and sustainability.

01 Uncompromising Quality Standards

We engineer for the future. Every phase of project development from initial procurement to final commissioning undergoes rigorous quality assurance assessments. We adhere strictly to international building codes, environmental benchmarks, and engineering standards to ensure that our infrastructure remains resilient and durable for generations.

02 Safety-First Culture

The health, safety, and well-being of our workforce, partners, and local communities are our highest operational priorities. We enforce a zero-harm policy on all construction and engineering sites. Through comprehensive safety training, rigorous risk assessments, and strict compliance with local and international occupational health and safety regulations, we maintain an incident-free working environment.

03 Strategic Public-Private Partnerships (PPP)

We act as a trusted institutional bridge between global investors, technical specialists, and governments. By aligning our execution strategies with national development agendas, we navigate regulatory frameworks seamlessly, manage political risk effectively, and secure long-term viability for all stakeholders.

04 Sustainable & Ecological Practices

Environmental stewardship is deeply embedded in our engineering DNA. We integrate green energy, resource conservation, and local biodiversity protection into every master plan, ensuring that industrial advancement does not come at the cost of the environment.

05 Empowering Local Human Capital

We believe true sustainability is built from within. By hiring, training, and utilizing local talent and regional suppliers, we directly combat outward migration, stimulate local economies, and leave behind a self-sustaining legacy of skilled professionals.
